SUMMARY

Computer Science student skilled in Java, Python, full-stack development, REST APIs, OOP, DSA, and databases. Experienced in building software applications and AI/ML solutions using modern development tools and technologies.

TECHNICAL SKILLS

Programming: Python, Java, C++, JavaScript, SQL
Machine Learning: Machine Learning, Deep Learning, PyTorch, CNN, NLP, Transformers
Computer Vision: OpenCV, YOLOv8, RT-DETR
Generative AI: LLMs, Generative AI, Prompt Engineering, RAG, LangChain
Core: OOP, DSA, DBMS, Problem Solving, REST APIs
Backend & Databases: Django, Django REST Framework, PostgreSQL, MongoDB, Supabase
Tools: Git, GitHub, Docker, Postman
Software Engineering Concepts: SDLC, Requirements Analysis, Software Design, Coding, Testing, Debugging, Version Control, Secure Coding, REST API Design, Code Quality, Problem Solving

PROJECTS

AI-Powered Career Recommendation & Skill Gap Analysis System
React.js | Django REST Framework | PostgreSQL | Generative AI | LLMs | Rag
- Developed an AI-powered career recommendation platform that analyzes user skills, interests, education, and preferences to generate personalized career recommendations.
- Built Django REST APIs and React.js interfaces for managing user profiles, skills, interests, and career-related data.
- Implemented LLM-based prompt engineering workflows for career matching, skill-gap analysis, and personalized learning recommendations.

NIDAR Autonomous Smart Agricultural Drone
- Developed a Computer Vision/ML model using Python and OpenCV to detect yellow agricultural targets from aerial images.
- Integrated the model with Raspberry Pi to identify target coordinates and communicate them to an autonomous spraying drone.
- Contributed to a national-level autonomous drone competition, securing 24th among 450+ teams across India.

Hybrid YOLO-Transformer Weapon Detection
Python | PyTorch | YOLOv8 | RT-DETR | OpenCV
- Developed real-time weapon detection by combining YOLOv8 and RT-DETR with Weighted Boxes Fusion (WBF), achieving 92% accuracy.
- Built OpenCV image/video inference with Transformer-based detection and optimized post-processing.

INTERNSHIPS

NIT Warangal — Machine Learning Intern
Hybrid YOLO-Transformer Weapon Detection | Python | PyTorch | YOLOv8 | RT-DETR
Combined YOLOv8 and RT-DETR with Weighted Boxes Fusion (WBF) for real-time weapon detection, achieving 92% accuracy.

CodeAlpha — Full-Stack Development Intern
E-Commerce Full-Stack Web Application | React.js | Django REST | PostgreSQL | JWT
- Developed an e-commerce application with React.js, Django REST Framework and PostgreSQL, building REST APIs for products, carts and orders.

EDUCATION

MVGR College of Engineering, Vizianagaram — B.Tech, Computer Science | CGPA: 7.35
AIIMS Junior College, Srikakulam — MPC | Percentage: 94%

CERTIFICATIONS

Foundations of Generative AI — Microsoft
Python Essentials — Cisco
Introduction to Python – Microsoft
